Leon Inspection Named to Forbes Asia's 200 Best Under a Billion for Fifth Consecutive Year

China Leon Inspection Holding Limited (“Leon Inspection” or “the Company,” Stock Code: 1586.HK), a global leader in inspection and testing, is delighted to announce that it has been recognized by the prestigious international financial magazine *Forbes* as one of “Asia’s 200 Best Under a Billion” for the fifth consecutive year. This accolade underscores the Company’s outstanding long-term performance and steady growth. Achieving this honor for five consecutive years highlights the Company’s sustained international recognition in corporate governance, operational strength, and profitability, further solidifying its leading position in the Testing, Inspection, and Certification (TIC) industry. As a key international player, Leon Inspection will continue to actively expand its domestic and international testing and inspection markets, seize industry development opportunities, and maintain its competitive edge in specialized sectors.

The “Asia’s 200 Best Under a Billion” list selects 200 high-performing small and medium-sized enterprises from tens of thousands of listed companies in the Asia-Pacific region with annual revenues between USD 10 million and USD 1 billion. The selection process involves a comprehensive evaluation based on key financial metrics, including debt levels, operating revenue, earnings per share growth, and one-year and five-year average return on equity over the most recent fiscal year and the past three fiscal years. These metrics collectively assess a company’s sustained profitability and financial health.

Being named to *Forbes*’ “Asia’s 200 Best Under a Billion” for the fifth consecutive year is a testament to the Company’s strong brand credibility, commitment to scientific innovation, and sustainable business philosophy. The Company has always placed shareholder returns and value creation at its core, adhering to a long-term development vision. Moving forward, the Company will remain dedicated to safeguarding shareholder interests, sharing the fruits of sustained growth with all stakeholders, and creating deeper, more stable value for all relevant parties.

Amid the rapid advancement of artificial intelligence (AI) technology, the global economy is undergoing profound transformation. In 2025, the Group is intensifying its AI-driven technological innovation, using AI as a core engine to drive

transformation and upgrades across its business segments, fully capitalizing on opportunities presented by industry changes. The Group will fully embrace the AI era, systematically fostering internal AI capabilities and integrating advanced technological resources to promote deep integration of AI with practical applications. By combining AI with robotic innovation, the Group will drive comprehensive technological upgrades and business empowerment, significantly enhancing customer service experiences and forging a new engine for the Company's core competitiveness. This will enable the Company to deliver longer-term, higher-quality investment returns for shareholders.
